Product Obsolescence Notification

Infinium HumanMethylation450K BeadChip Kit

Dear Valued Customer,

As part of our continuous commitment to provide customers with the most current technology and best experience, we recommend current Infinium® HumanMethylation450K BeadChip Kit customers transition to the new [Infinium MethylationEPIC BeadChip Kit](#) for CpG analysis.

The Infinium HumanMethylation450K BeadChip Kit will no longer be available for order on the Illumina website after December 31, 2015. Some projects may require additional product after this date for validation. Please contact your local account manager or insidesales@illumina.com before November 15, 2015 to discuss any needs for continued 450K supply into 2016.

Products Affected

Product/Catalog Number	Obsolescence	New Product/Catalog Number
Infinium HumanMethylation450K WG-314-1003 (24 Samples) WG-314-1001 (48 Samples) WG-314-1002 (96 Samples)	December 31, 2015	Infinium MethylationEPIC WG-317-1001 (16 Samples) WG-317-1002 (32 Samples) WG-317-1003 (96 Samples)

Transition Plan

For whole human methylome analysis on array technology, Illumina recommends the new [Infinium MethylationEPIC](#) array. The MethylationEPIC array provides an unprecedented view of >850K CpGs in an 8 sample per chip format, utilizing the same chemistry and workflow as the original HumanMethylation450K BeadChip. The MethylationEPIC array carries a high percentage of the original 450K bead types for backwards compatibility.

We value your partnership and are dedicated to supporting your endeavors with innovative solutions. Please email techsupport@illumina.com with any questions.

Sincerely,
